Professional Summary

Computer Science undergraduate passionate about building scalable full-stack web and mobile applications. Experienced with React, Next.js, React Native (Expo), Node.js, Express.js, MongoDB, and TypeScript. Recently expanded into Agentic AI by building LLM-powered applications using LangChain, LangGraph, LangSmith, and Groq APIs. Strong interest in backend systems, modern frontend development, and AI-driven software engineering.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, SQL

Frontend: React.js, Next.js, React Native (Expo), HTML, CSS, Tailwind CSS, Vite

Backend: Node.js, Express.js, REST APIs, JWT, Clerk Authentication

Databases: MongoDB, MySQL, Appwrite

AI / LLM: LangChain, LangGraph, LangSmith, Groq API, Hugging Face, RAG, Vector Embeddings

Tools: Git, GitHub, Docker, Linux, VS Code, Postman

Projects

Squawk — Real-Time Chat Platform

- Engineered a full-stack real-time messaging platform using React, Node.js, Express.js, MongoDB, and Socket.IO.
- Integrated Clerk Authentication to provide secure user authentication and protected application routes.
- Designed RESTful backend APIs and MongoDB data models for scalable user and message management.
- Built a responsive chat interface with reusable React components and modern Tailwind CSS styling.

AI Chatbot — Agentic AI Assistant

- Developed an AI-powered conversational assistant using LangChain, LangGraph, Streamlit, and Groq LLMs.
- Implemented multi-step agent workflows with LangSmith observability for debugging and execution tracing.
- Built Retrieval-Augmented Generation (RAG) pipelines to enhance response quality using external knowledge.
- Explored conversation memory, tool orchestration, and agent-based reasoning architectures.

Netflix Clone — Full-Stack Streaming Platform

- Developed a Netflix-inspired streaming platform using the MERN stack with secure JWT-based authentication.
- Integrated TMDB APIs to dynamically display trending movies, search results, and personalized watchlists.
- Designed responsive interfaces with reusable React components and Tailwind CSS.
- Built scalable backend APIs to manage user authentication and application data.

Education

Swarnim Startup & Innovation University, Gujarat

Bachelor of Technology in Computer Science Engineering

Expected 2027

Roses English High School, Manipur

Higher Secondary Education (Class X)

Assam Rifles Public School, Manipur

Secondary Education (Class XII)

Additional Projects

- X (Twitter) Clone — Full-stack social networking platform with authentication, posts, comments, and likes.
- DevEvents — Next.js application for discovering and booking developer conferences and hackathons.
- Product Store — MERN CRUD application featuring REST APIs, MongoDB persistence, and responsive UI.
- TODO-Expo-App - Solely made for learning Purpose The very first app that i have build by myself
